

# CITB Site Management Safety Training Scheme (SMSTS)

## Introduction

This is a five-day course which provides project managers, site managers and supervisors, business proprietors and client-based personnel with the knowledge and skills to enable them to ensure healthy and safe conditions for construction site employees.

## Course Duration

IHTC Ltd offer this over **Five** days - delegates must attend all 5-days of the course, completing a total of 37.5 hours to be eligible to take the final assessment.

## Who Should Attend?

The course is suitable for a wide range of persons connected with the construction industry to include site managers, engineers, architects, local authority employees, large client representatives, proprietors of small businesses and sub-contractors. Ideally candidates should have fulfilled a supervisory or management role within the construction industry.

## Course Programme

The Health and Safety at Work Act  
Construction Design and Management (CDM) Regulations  
Risk assessments/method statements  
Recent changes in accepted working practices  
Behavioural safety  
Management of occupational health  
Electricity  
Excavations  
Working at height  
Scaffolding  
Demolition  
Confined spaces.

## Certification and Assessment

Delegates will be assessed daily by their input to group exercises. There is a group presentation on day five followed by a multiple-choice assessment. Successful delegates will be awarded with a CITB certificate, which is renewable every 5 years by attending a CITB approved 2-day refresher course.
